

THE PROOF THAT ALLAH DOES NOT EXIST IT IS IN THE WORDS OF KORAN

SUMMARY

ALLAH LIVED ON WATER BEFORE CREATING THE UNIVERSE

Koran and Muhammad's citations [hadith] describe Allah's life before of Creation. Islamic verses →

How does it explain the presence of water before of Creation?

Why Allah was on waters instead of the absolute empty?

■ For koranic science, empty was a mortal precipice (Koran 35,41) analogously to the terror of empty of aristotelic physic (*horror vacui*). In this abyss without the end, nor Allah was able to suspend himself in the empty where the mass of water filled up the space to permit to Allah to float in the empty.

■ Today we know that it is a primitive conception and unfounded too as the astronaut McCandless showed strolling freedom in the empty without anyone point of support (1984-NASA). Allah didn't know that to a distance of 400 km on the Land, the effort of gravity reduces **and it flutters easy completely**. It is the confirmation that Allah has never been *in the highest*.

■ For the koranic science water was eterne and indivisible: it was Not created because he lived with Allah before of Creation and it was an indivisible element as in the ancient Talete's belief (600 BC) just to the Lavoisier's molecular discovered in 1783.

■ Today we know that water is a chemical composition formed **millions of years after the Big Bang**, so that *koranic Creation* happened after that the universe was here born, without Allah's knowing.

The presence of hydrogen and oxygen atoms, **before creating cosmos**, they are testimonial proof (Koran 2,23) that Islamic Creation is a scientific and religious hoax.

**So, Allah is a “theological puppet”
created by a novelist disguised by Messenger**
